

Case packer PC242

PACKAGING SYSTEM PARABOLIC CHUTE

FEATURES

Packaging system:
Places products in open boxes by pushing them out of two parabolic chutes that gently rotates in the box. This means the products are handled with as much care as possible. The product is not exposed to any drop, suction or other external forces. Packaging like this, is as gentle as hand packed.

Products: All type of punnets- Flow wrapped, stretch wrapped, net wrapped, clamshells etc.

- Fast changeover system with adjustable rails
- Stainless steel
- Empty box infeed from all directions
- Full box outfeed from all directions
- Manual run through for products
- Rotating system for gentle drop.
- Either standalone unit with HMI and PLC or as part of bigger line control.
- Machine components from renowned brands- worldwide availability.
- Safe, robust, reliable and environment friendly solution.
