

Palletizer PTX

FEATURES

The PT models palletize all products onto EU, UK, US and internal pallets. The gripping tool can use either vacuum, gripper or a combination to place products precisely on the pallet.
The plug and play palletizers can be modified with several functions and patterns- They can palletize onto 1 pallet, palletize on 1 pallet and de-palletize another, as well as palletize/depalletize to several stations. They can be delivered either as stand-alone or as part of a fully automated end-of-line solution. With the pattern generation software, it is possible for all operators to modify and change the palletizing pattern.

Products: All types of boxes, crates and bags onto any type of pallet.

- Option for automatic pallet infeed from magazine
- Stainless steel frame
- Option for multiple items per pick, depending on pattern
- Dimensions of inlet can be customized.
- Either stand-alone unit with HMI and PLC or part of bigger line control.
- Machine components from renowned brands- Worldwide availability.
- Safe, robust, reliable and environment friendly solution.
- Remote access and service ready for industry 4.0

SPECIFICATIONS

Box/Crate type:	All common types
Pallet type:	All common types
Speed:	Up to 5 cycles per minute depending on weight, pattern, and box configurations

APPLICATION
